Re-advertisement

National AIDS Control Programme (NACP) is spearheading the national HIV response in the country. In light of the available epidemiological evidence, NACP has introduced an innovative prevention model to provide a key population specific defined package of services to the respective key populations.

The NACP as Principle Recipient (PR) of the Global Fund grant (GFATM-NFR-2018-20) intends to hire the services of a National or an International NGO/organization to implement the Community based Model in the capacity of sub-recipient (SR) (GFATM-NFR-2018-20) to NACP. The model is aimed at scaling-up HIV testing and prevention services, improving program coverage and addressing stigma and discrimination associated with these key populations and HIV AIDS.
